

# SEIJ Invite Papers

---

**Dr. Ruchika Malhotra<sup>1</sup>**

Published online March 2012

The SEIJ is intended to be a primary source of research and development on software engineering and all areas of software engineering. SEIJ intends to include high quality and original research in the various disciplines of software engineering. Areas covered by the journal include Software quality and metrics, Software testing, verification and validation, Software requirement engineering, Software modeling, design and programming, Software reliability, maintenance, security and evolution, Software project management including effort estimation, cost models and schedule and Empirical studies covering all aspects of software engineering.

In 2011, journal received 27 full submissions, out of which 8 were eventually selected for publication- 29.62% acceptance rate. All manuscripts have undergone reviews by two or more peer reviewers. Prior to peer review, SEIJ editors have evaluated the suitability of each manuscript to determine whether they match the journal mission.

The journal welcomes and encourages submissions within the scope of the journal. The ideas must be important, thoroughly analyzed or empirically validated that must add value addition to software engineering research and practices.

SEIJ invites manuscript concerning original research and new ideas in the areas of software engineering, mature research papers

that illustrate and address challenges in software engineering through current literature and illustration of solution to the problem along with the results. The journal will seek practical experience reports from practitioners. This includes the results of the application of software techniques (methods, procedures, tools, processes) and their effectiveness. The journal also welcomes state-of-art surveys, reviews and short papers.

All manuscripts should be submitted in the journal's submission format. The submission instructions must be followed given on the site (<http://seij.dce.edu/instruction.html>). Manuscripts must not have been published previously and not currently submitted or under consideration by some other journals/conferences. Only original research papers will be accepted for publication.
